Scoring (Enter below on last sheet of each rig or band)

Nr. stns. worked ... contact points claimed:- .....

X 3 if both transmitter and receiver supplied from independent power source:- .....

Power multiplier:  
3 if transmitter input 30 watts or less, 2 if input between 30 and 150 watts, 1 if input more than 150 watts:- .....

X 1.5 if battery power used on both transmitter and receiver (applies only to mobile, or Unit-Individual entries):- .....

SCORE: .....

In entering total multiplier for each band on summary sheet, multiply, do not add, multipliers. (Example: If a multiplier of 3 is claimed for independence-of-mains and a multiplier of 3 for transmitter input under 30 watts, the total multiplier is 9 and should be entered in the multiplier box, for that band. Use single separate sheet for figuring FD message points.)
